DISCREET COMMUNICATION SOLUTIONS

New threats need new responses

Today the threats to our society are becoming more sophisticated, complex and unpredictable. Undercover surveillance is playing an increasing role in mitigating these threats.

From the most sophisticated, wireless solution for 'deep' covert operations, to simple, cost effective products for light surveillance duties, Savox has a range of lightweight, unobtrusive radio accessories that allow you to communicate discreetly in all situations.

Industries / Applications

- Deep' Covert Operations
- Surveillance and Anti Terror
- VIP and Diplomatic Protection
- Police and Law enforcement
- Commercial and Store security

The Benefits

- Provides totally discreet communication
- Wireless solutions available for maximum freedom
- 'Tones' options allow communication even when speech is impossible
- Interference free products provide clear communication near lighting systems, power lines etc
- Converts your existing radio into a covert solution
- Savox accessories work with most of the leading manufacturers radios

SAVOX Fully covert solutions

THE SAVOX CLARITY INTERFERENCE FREE SYSTEM

An interference free covert neckloop/microphone system which comprises of a radio specific connector, a wireless receiver module (with in-built PTT) and a disguised wireless Car Key Fob PTT. For use with the Savox RCR7 wireless earpieces. Provides interference free communications when used near power lines and other sources of interference.

THE SAVOX COVERT BASE UNIT

A covert inductive system complete with wireless PTT for use with RCR1-6 wireless earpieces in a covert surveillance role.

SEP 120

An inductive brooch microphone system complete with remote barrel PTT for use with wireless earpieces in a covert role.

SEP 110

A covert inductive neckloop/microphone system complete with remote barrel PTT for use with wireless earpieces in a covert surveillance role.

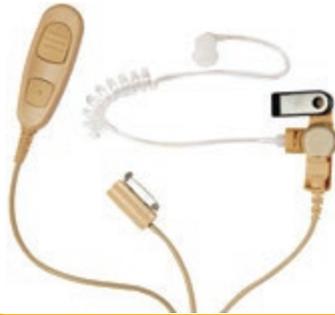

SAVOX Semi covert solutions

All wire kits are available as pluggable versions – providing the widest range of earpiece options

3 WIRE KIT

A 3 wire kit fitted with the same replaceable earpieces as the 1 wire kit. Inductors can be connected for use with wireless earpieces. 2nd cable is fitted with a discreet microphone and clothing clip. 3rd cable is fitted with a barrel style PTT (Push To Talk) unit. Suitable for semi/fully covert applications.

2 WIRE KIT

2 wire kit that plugs into the radio connector, fitted with the same replaceable earpieces as the 1 wire kit. Inductors can be connected allowing use with wireless earpieces. The 2nd straight cable is fitted with a barrel style Mic/PTT (Push To Talk) unit and cuff/lapel clothing clip. Suitable for door stewards and private security personnel.

1 WIRE KIT

A 1 wire kit designed for listen only applications. Includes a clear eartip, quick disconnect acoustic tube and replaceable speaker capsule. Can be used with ear inserts for increased comfort, suitable for rugged use.

ENTRY LEVEL WIRE KIT WITH PLUGGABLE OPTIONS

A wire kit that plugs into the radio connector and provides Mic/PTT functionality. Fitted with a clothing clip for securing to the wearer's lapel. A cost effective entry level solution.
